children.**

ABOUT PILLARS

NB: Children are vulnerable and at risk if not supported and cared for

PILLARS OF HOPE CHILDREEN'S HOME HISTORY

The home was founded in 2013 by 2 young men who were concerned by the plight of children in crisis.

Location.

Though started in, Noonkopir location Kajiado County opposite Kitengela Muslim Girls School. 81 orphans and vulnerable children took residence in this facility. Most children are brought to the home by court orders, children's officers and the general public.

Current status

Currently the home is register with the government under the registrar of societies. The home enjoys a lot of good will from the community.

Management.

The home is governed by the following;

1. A constitution---The home is guided by a constitution that has been approved by the registrar of societies.
2. The constitution also recognizes the executive board that is the overall leadership and decision making entity of the society. It is comprised of 15 members and board meets quarterly per year or when there is a reasonable need to do so.

WHO CHILDREN ARE ADMITED TO THE HOME?

The home admits boys and girls ages 0 to 18 from any of the following situations;

1. Street children.
2. Homeless children
3. Orphans and vulnerable children.
4. Abandoned and neglected children.
5. Children rescued from abuse such as abusive homes, early marriage and female genital mutilation.
6. Any needy child from whatever background cannot be turned away.

The home offers the following services or has long term plans to do so;

1. Temporal or permanent shelter.
2. Feeding and nutritional support because some of the children are malnourished.
3. Linkages to medical services.
4. Education at kindergarten and primary levels and even outsourcing for secondary education.
5. Adoption and foster care services.

The needs at the home.

On a land yet to be bought from one of the long time supporters of the children's home in Athi River the home seeks to construct a modern facility that will save the society the demands of rent and lack of adequate space. The new facility envisions hosting an average of 200 children. This will be an ideal place for the vulnerable children to make a home and fins reprieve as well.

The land is already available and minor constructions such as a modest fence and pit latrines are ongoing. The following are the needs as per now;

1. **Basic infrastructure** including basic housing, classrooms, toilets, water. The housing they have currently is made of iron sheets which get temperature fluctuations. It becomes very hot during the day and cold during the nights. The home is also in Kajiado district, a district that lacks sufficient water supply.
2. **Financial resources.** The home has no donor and does not have financing of their own. The funds they use are given to them by well-wishers who listen to their story and give little monies to support them.
3. **Food.** Having no stable donor and proper infrastructure it is hard for the home to have a regular and reliable food supply. The community and well-wishers have been supportive with the women at the market contributing from their remains of what they sell and giving to the children.
4. **Borehole;** This will provide the home with a clean and reliable source of water.
5. **Professionally qualified staff.** The home does not have money to pay for the services of qualified staff making it rely on volunteers that do not have professional skills. But it is a good start as they are able to meet the needs of these boys and girls.

Partners.

1. The government through the registrar of societies and the children's department.
2. Churches and ministries.
3. Volunteers from overseas.
4. Well-wishers.

ACHIEVEMENTS.

Currently the home is paying fees for 64 students under our Program in the Public schools located in the various regions in Kenya. Well wishers & us Pillars identifies children/orphans from the poorest families in Kenya who have failed to access education due to poverty as well as those neglected.

Currently, we are going on with campaign “Keep Our Children Safe and in School” and we hope to increase the number of children by 70% in the next 3 years of our strategic year plan 2013-2022.

We have been able to establish various community outreach programs which tackle various issues in life among girls like issued of sanitary towels, and health-hygien awareness. Not only do we train them in skills but we also teach them about many life aspects which include health and sanitation, HIV/AIDS awareness, and poverty eradication methods based on Godly principles. This has greatly impacted the girls and women whom we have contacted in our External Program. We also donate basic life materials (Sanitary towels) to them, as this is one step to restore hope and to empower these wonderful girls.

Direct Beneficiaries.

Children brought in abject poverty with either both parents or single parent.

Orphaned children.

PILLARS OF HOPE CHILDREN'S HOME HISTORY

This is a non-profitable institution which was started in 2013 with two gentlemen namely Sir Vitalis Nyambeka and Sir Moses Muchika. Sir Vitalis used to live and work at Nairobi with his family. He supported the home financially whereas Sir Moses used to live in the home with the kids. Sir Vitalis would visit them in the weekend. Their vision was to restore hope to the hopeless. It was located at Kajiado county, Kitengela, opposite Noonkopir Muslim Girls.

By then it had 36 kids whereby Sir Vitalis had 30 children and Sir Moses 6 Children. At first it had 8 rooms which were rented.

By the end of 2014 it had 55 kids and more rented rooms were added. The kids together with the Directors faced many challenges like lack of water, enough food and also a learning institutions were too far. In 2016 the home got a certificate that the home was registered under the registrar of societies. By then it had 81 kids and 47 rented rooms which was to be paid 47,000/- monthly. Food started being inadequate therefore the directors decided that they go and ask some food from the market (Kitengela). They were given and also allowed them to go for more food if they needed.

In 2017 the owner of the land (landlord) wanted back his land after the directors found out that he had been distributing the home bank tins at the malls, supermarket and receiving money without their acknowledgment therefore the children were taken to other homes while others to their guardians (those who had) and others had no choice but to go back to the streets.

In 2018 Sir Vitalis Nyambeka revived the home after one of the well-wishers donated a land. (33by 55). It was located at Machakos County Athi-river near Daystar University behind the China Company site.

Before it was temporarily constructed, the dorms were rented for both boys and girls. It was then constructed, and they shifted. The Ndovu cement came for a visit and after hearing the history agreed to construct for them. The director told the owner of the land about it but surprisingly she said that she had changed her mind and would sell it at 4 million. The Ndovu cement company went underground never to contact them. Life there was hard because of many challenges, one was that they had to walk for long distance in order to get water to bathe, wash, and clean which wasn't enough.

The director had to do manual work like carrying heavy stones on a construction sites to sustain the children's daily needs.

Food was a problem for they depended on well-wishers for support. If we never got visitors, we stayed without food. In one of the construction sites, the director met this lady who agreed to give them water for free. She also gave a piece of land where they would do farming. After not receiving the first installment, the owner of the land wanted it back. The lady who provided water for them told them to move to the farming land. It was half an acre and she was selling it at 4 million.

This land was near the water point, the school and also the main road. Through social media the director met a Nigerian man who wanted to fully support the home. He agreed to pay for the land and construct for them. A meeting was conducted to discuss the payment of the land. At the meeting the owner increased the price to form 4 million to 7.5million. After the meeting, the well-wisher lost interest in the home and disappeared without a call.

Due to its high price, the director decided to look for another land. Through prayers, a land was found. An acre that goes for 4million near Daystar University. The first fundraising was conducted online whereby the first installment of 100,000 shillings was raised.

The owner of that land donated 500,000 shillings. The remaining amount to pay is 3.4 million. The second fundraising will be held on April 2021. We pray and hope that everything goes well and the kids finally get a place to call home.
